

READY SEAFOOD

MAINE • U.S.A.

Founded by brothers John & Brendan Ready in 2005, Ready Seafood supplies live and processed Lobster products from the coast of Maine, to retail, wholesale, and food service companies worldwide.

In September of 2019, Ready Seafood moved into a brand new 52,000 sq ft lobster processing facility, in Saco, ME. This plant utilizes cutting edge processing, cooking, and freezing technology to produce the highest and most-consistent quality Lobster products available on the market. Our high-pressure processing (HPP) machine enables us to produce our proprietary Cold Cracked™ Lobster, an all-natural raw lobster meat product that opens the door to endless culinary opportunities. In addition to our Cold Cracked line, we are continually producing more traditional frozen Lobster items such as Tails (in the shell) and Cooked Meat.
