

About

Our Goal: To expand our business by offering diversified products to my existing customers and obtain new customers with my current product lines and to contract more products with farmers both locally and around the world. Pacific Ag Commodities core focus is being a supplier of certified organic and certified NON-GMO feed and food ingredients to industrial end users. Our customers include growers and processors, as well as manufacturers of finished food products. By supplying sustainably grown and sourced grains, it allows us to be successful in all aspects of our agricultural related business.

Our Focus: Commodity merchandising of organic and NON-GMO agricultural products including grains, oils, wheat, barley, peas, and rice ingredients. We can ship via bulk truck, rail, or ocean vessels. Our import and export department specializes in bulk commodities as well as container shipments domestically and internationally. We develop strategic points of view across agricultural value chains (production, handling, processing, etc.), maintaining strong pulse on the financial and global currency markets as it pertains to end users and price fluctuation to ensure the utmost service.
