

Raw Cane Sugar

Raw
Cane
Sugar

Organic and
Conventional

Granular /
Cubes

Unrefined cane sugar contains 17 amino acids, 11 minerals and 6 vitamins, including antioxidants, that may help reverse oxidative damage. It is made up of sucrose, fructose and glucose. Sugarcane juice is alkaline in nature because of the high concentration of calcium, magnesium, potassium, iron, and manganese, which helps prevent diseases like cancer that cannot survive in an alkaline environment.

Organic cane sugar is not like brown sugar, which is white sugar with molasses thrown back in.

The light color of organic cane sugar is comparable to “raw” sugar, a sign that it is less processed compared to other sweeteners.

**Available in private label retail
or bulk packaging**
